

# Where learning takes shape.

Shaping spaces. Shaping minds.

WHO WE ARE

Designing for the  
way students think,  
feel, and connect.

At Marco, we believe the space around a learner shapes the mind within. For decades, we've partnered with educators and designers to create environments where curiosity grows, focus deepens, and every student belongs.

We design with intention—because the right space doesn't just support learning. **It transforms it.**

WHY SHAPE MATTERS

# Shape is more than design—it's direction.

It guides movement, sparks connection, and influences how students feel. A curve can open a conversation. An angle can focus attention. An organic form can spark exploration.

In the right combination, shapes become a quiet language—telling learners where to gather, when to reflect, and how to engage.

The left side of the image features a collection of overlapping, hand-drawn geometric shapes in white, orange, and green. These shapes include circles, squares, triangles, and various irregular polygons, some with rounded corners and others with sharp angles. The shapes are scattered across the dark gray background, creating a sense of dynamic movement and visual complexity.

THE LANGUAGE OF SHAPE

# Every shape tells a story.

Curves calm—creating safety, softness, and approachability.

Angles focus—bringing clarity, energy, and purpose.

Organic forms invite engagement—encouraging creativity and collaboration.

By blending these elements, we design spaces that balance focus with flow, structure with spontaneity.

### **Triangle**

Ideal for pair work or triads—balanced visibility.

### **Half Moon**

Creates soft boundaries for focus or 1:1 interaction.

### **Wave**

Softens transitions between zones; softens flow.

### **Hexagon**

Encourages collaboration + modular flexibility.

### **Trapezoid**

Total versatility. Alone, pair, grouped. Sense of flow.

### **Square**

Single focus, structure + task completion.

### **Circle**

Promotes inclusion, equality + group dialogue

### **Chevron**

Visually dynamic, supports direction flow and collaboration.

### **Flower**

Fosters creative group energy + open conversation

### **Kidney**

Supports guided reading, small group teaching.

FLEXIBLE BY DESIGN

# Spaces that include every learner.

Every learner deserves a place that feels made for them. That's why we combine shapes, heights, and postures—a curved table for group dialogue, a standing station for active learners, a quiet corner for concentrated work.

When students see themselves reflected in the design of a space, they feel they belong—and belonging fuels learning.

Shape is more than furniture.  
It's a silent partner in learning.

It influences behavior, nurtures opportunity,  
and expands what's possible.

When we shape spaces with care,  
we shape the minds and futures of  
the learners within them.
