What Designers Need to Know

- Sustainable products feature third-party certifications, recycled materials, and circular design principles, demonstrating industry commitment to environmental impact reduction.
- Performance-focused solutions address durability, acoustics, and hygiene, enhancing safety and well-being across multiple market sectors.
- Designs incorporate biophilic influences, modularity, and flexibility, supporting accessibility, reconfigurability, and aesthetic storytelling in commercial spaces.

Celebrating 28 winning products that embody inventive, purpose-driven design and push commercial interiors forward.

DESKS

CUE (2025 PIA Winner)

Built for flexibility, CUE features a hidden magnet connection, silent sit-to-stand transitions, and durable, eco-friendly surfaces, making it ideal for modern classrooms, labs, and flex zones.

Interiors + Sources Product Innovation Awards logo.

CUE from [Marco](#) is a next-generation pneumatic desk and mobile podium system built for modern classrooms, labs, and flex zones. Designed for versatility, the desk and podium can function together or separately, with a hidden magnet keeping them connected when needed. Lever-activated, power-free pneumatic height adjustment allows silent sit-to-stand transitions from 28" to 48", while locking swivel casters enable instant mobility. Durable, ADA-compliant, and featuring GREENGUARD Gold certified worksurfaces, CUE provides ergonomic, flexible, and sustainable solutions for active learning environments.

Client Testimonial

// *The nurses love that our podium cabinets lock, so they can go room to room and not have to worry about anyone accessing the Rx's. — Wentzville School District Administrator, Missouri //*
